## Jedinstvo različitosti

Pred vama je knjiga koja prati izložbu kakva do sada nije realizovana u okviru Sekcije umetničke fotografije Udruženja likovnih umetnika primenjenih umetnosti i dizajnera Srbije. Tokom svih proteklih godina izložbe Sekcije fotografa pravljene su tako što bi autori doneli svoje radove i oni bi bili okačeni na zidove neke od beogradskih galerija. Ono o čemu nije vođeno dovoljno računa jeste ogromna različitost u realizaciji fotografija. Uramljene, neuramljene, kaširane, mat ili sjajne, velike, zaista velike, male i minijature... Sve ovo činilo bi izložbu koja je trebalo da predstavi određeni presek kroz autorski rad i delovanje tokom godinu dana. Ono što je nedostajalo bila je ona čuvena, nevidljiva ali veoma često spominjana, crvena linija, fil rouge, koja treba da različitosti pomiri i spoji u jednu vizuelnu celinu. I tako smo došli do ove izložbe.

Ovoga puta, na Godišnjoj izložbi učestvuje skoro 50 autora, svaki sa po četiri rada koji čine svojevrsnu celinu. Ono što ovu postavku izdvaja od svega što je do sada viđeno jeste ujednačenost izloženih fotografija koja je postignuta uprkos ogromnoj razlici u odabranim temama i načinu njihovog predstavljanja. Kada je započeta priča o ovoj izložbi izgledalo je nemoguće pomiriti razlike između fotografa i njihovih pristupa ovoj umetničkoj disciplini. Prvi pomak dogodio se onog trenutka kada je prihvaćena ideja da fotografije budu u kvadratnom formatu, dimenzija 20x20 cm i ukupnih dimenzija sa paspartuom 30x30 cm. Na taj način dobijene su fotografije koje, kao i pikseli digitalnih fotografskih uređaja, mogu da se kombinuju i slažu na neograničeno mnogo načina.

U knjizi, fotografije su poredane po redosledu pristizanja radova.
